

COVERED BY FIESTA

|| Legacy Series

FIESTA'S NEW GENERATION OF TENTS, A PERFECT ADDITION TO OUR CURRENT DESIGNS.

With its curved lines, the Legacy Series boasts aerodynamic qualities and an innovative look that is sure to draw the eye of everyone in the industry. This tent expands in both width and length without compromising solidity, all the while minimizing the number of additional parts required.

Combining the advantages of frame tents and clear span structures, this product will no doubt add value to anyone's tent rental inventory. Features include kedered roofs and walls, curved beam arches, rigid connectors and frame assembly without any nuts or bolts.

In addition, this tent line can be set up as a frame tent or as a clear span structure.

**MANUFACTURED BY
FIESTA TENTS LTD.**

WARNING
This product has been manufactured for use as a temporary structure. For the safety of all occupants, evacuation is recommended if threatening weather occurs or if there is any doubt concerning the safe use of this product.

TECHNOLOGY

Anodized aluminum frame assembly composed of a 2 5/16" x 3 1/2" extruded box beam
 Self-standing structure
 Rigid connectors
 Clear anodized finish on all aluminum components
 All steel components with galvanized or zinc plated finish
 No nuts or bolts required for frame assembly
 Anchoring directly in tent upright base plates with or without guy outs
 Expandable structure in width and length
 10' arches convertible into 20' and/or 30' arches by adding rafter extensions

Standard bays in increments of 15' and 10'
 Vinyl tops integrated to the extruded aluminum frame (sliding "kedered" tops)
 Vinyl walls integrated to the extruded aluminum frame (sliding "kedered" walls) with median divider (2 pcs)
 Vinyl walls with or without wall bars
 Compatible with Solara series vinyl walls

FEATURES

Less parts
 Very versatile
 New extrusion
 Easier and faster installation
 Structure with guy outs or side/roof steel cable bracing (bracing required when installed as self standing clear span)
 Gable end frame
 Engineered to building code: ASCE 7-02

Solid frame structure composed of a 2 5/16" x 3 1/2" extruded aluminum box beam
